

## HOMEWORK MENU: Summer 1<sup>st</sup> Half Term

### Maths

This half term, we will be looking at **time** in our Maths lessons.

Ask somebody at home to help you write down the time that you:

- Wake up
- Leave for school
- Get home
- Go to bed

Draw a clock showing the correct time for each thing.

### Science

In our Science work, we will be looking at **plants**.

Take a photograph or draw a picture of a plant that you have in your garden, in your house or that you see on the way to school.

Do you know what it is called? Make a list of things you think it needs to survive.

### PSHE

We are starting some work on **emergencies** and who to ring if we need help.

What number would you ring in an emergency and what would you say? Practise this conversation with someone at home, including saying your address to share with the emergency services.

This does not need to be recorded in your books but please do spend some time practising this at home.

Count out 12 small objects (such as counters or blocks). Can you use them to find the answers to these questions?

$$\frac{1}{2} \text{ of } 12 = \boxed{\phantom{00}}$$

$$\frac{2}{4} \text{ of } 12 = \boxed{\phantom{00}}$$

What have you discovered about one-half and two-quarters?

### English

*We are going to be working on **recounts** this half term.*

*To practise, write a **recount** about something that you did over the weekend.*

*Remember to write in the **past tense**!*

***Everyday:** Read with somebody at home. Please record this in your reading journal!*

***Every week:** Complete your Maths worksheet and check on Times Table Rockstars.*

***Every other week:** Pick something from our Homework Menu to complete! These activities are just a starting point, feel free to take them in any direction you like.*
